Project Name: Sales Automobile Using Salesforce

CRM

Team ID: LTVIP2024TMID11576

Team Leader: V SHILPA

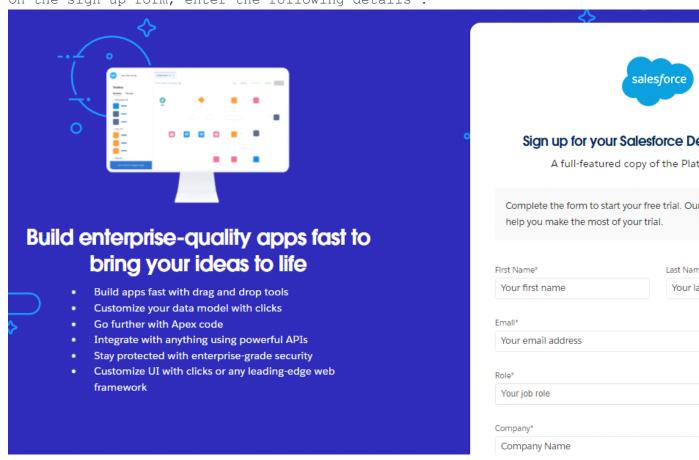

Salesforce

Creating Developer Account

Creating a developer org in salesforce.

• Go to https://developer.salesforce.com/signup

• On the sign up form, enter the following details :

- First name & Last name
- Email
- Role : Developer
- Company : College Name

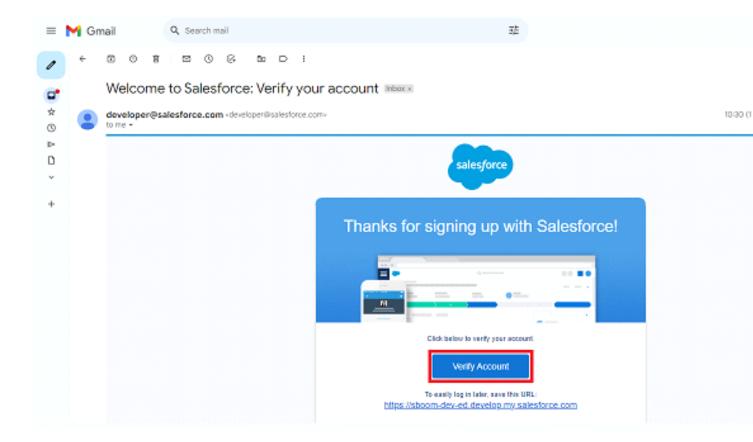

- County : India
- Postal Code : pin code
- · Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in the format : username@organization.com

Click on sign me up after filling these.

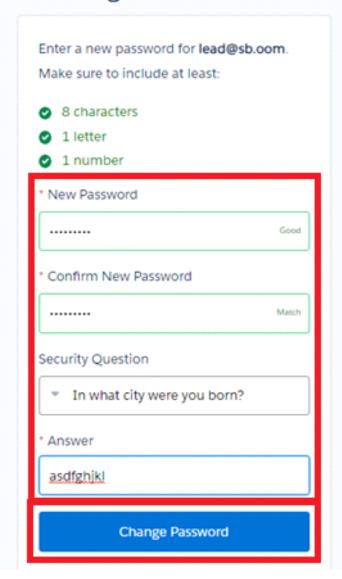

Account Activation

• Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

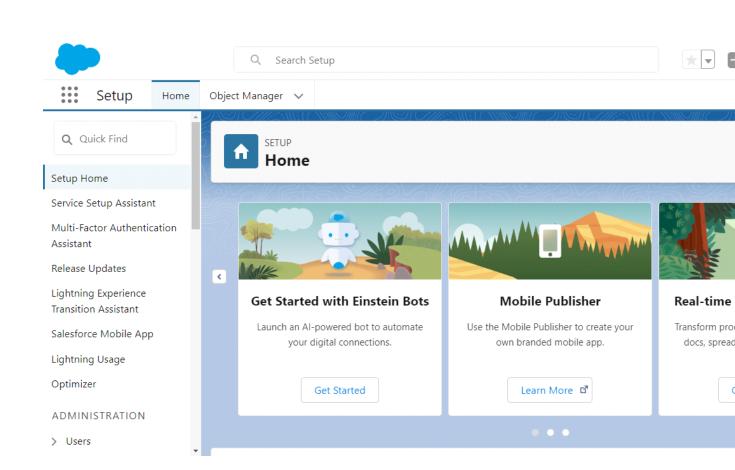

- 1. Click on Verify Account
- 2. Give a password and answer a security question and click on change password.

Change Your Password

1. Then you will redirect to your salesforce setup page.

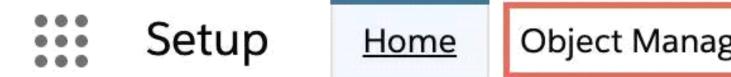

Object

Create Automobile Information Object

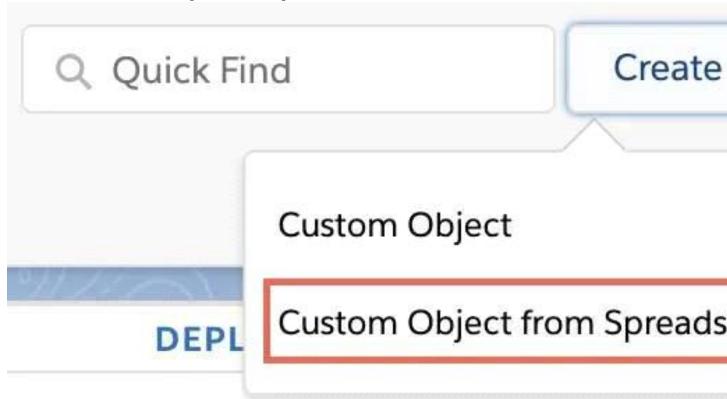

- Download and open this spreadsheet, save it as AutomobileInformation.csv.
- Make sure to download the File into CSV format.
 Note: Make sure to have the name of the file as "Automobile Information".
- Log into your salesforce account, click , then select Setup

 1. Click the Object Manager tab.

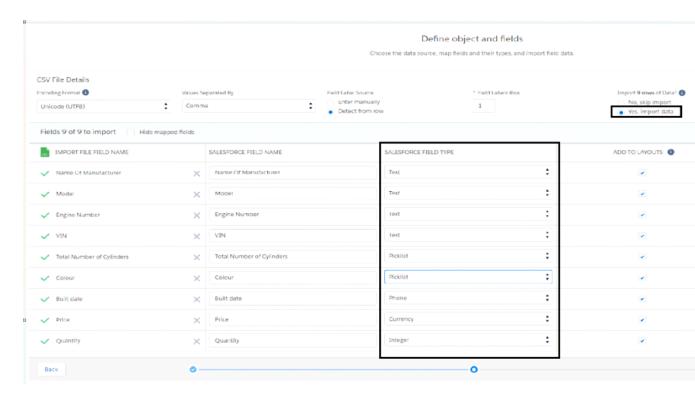

2. Click Create.

3. Select Custom Object from Spreadsheet.

- 4. Click Login With Salesforce.
- 5. Enter your Salesforce account username and password. (which you have created in the Milestone 1, Activity 1)
- 6. Click Log In.
- 7. Click Allow.
- 8. Click Upload.
- 9. Navigate to the Automobile Information.csv file you downloaded and upload it. Salesforce automatically detects the fields and populates all its record data. Choose the Record Name field and make sure all fields are with the proper datatypes as below as they are.

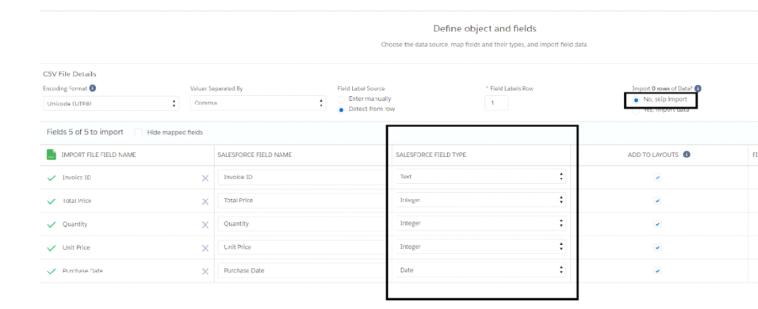

- 1. Click Next and enter the following settings.
- 2. Click Finish. The Automobile Information object is successfully created and data imported, all within minutes.

Create Invoice Object

Create Invoice object, just as we have created an Automobile Information Object using this sheet

Make sure to Download the File into CSV Format.

Note: Make sure you do field mapping with proper field type as shown below.

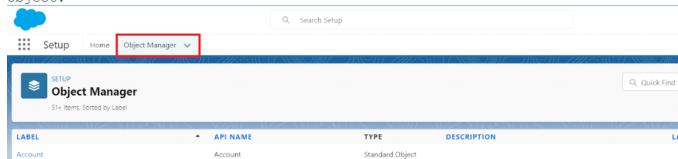

Create Automobile Object

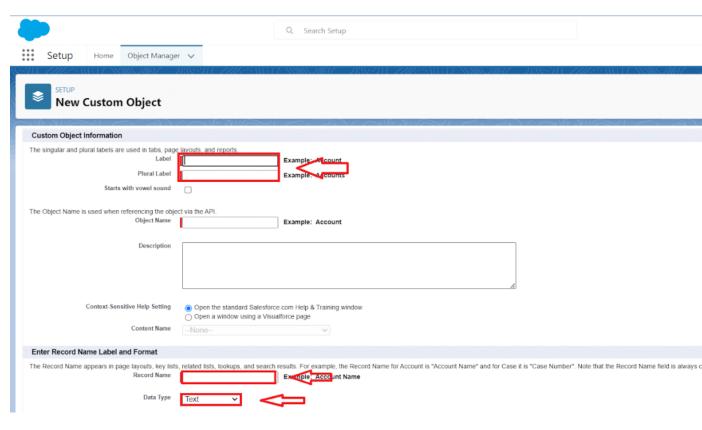

The purpose of creating an Automobile custom object is to store and manage information about Invoice.

To create an object:

 From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.

- Enter the label name? Opportunity Automobile
- Plural label name?Opportunity Automobiles

- 1. Enter Record Name Label and Format
 - Record Name >> Opportunity Automobile Id
 - Data Type >> Auto Number
 - Display Format >> OA-{0000}
 - Starting Number >> 1

Ì	Custom Object Information The singular and plural labels are used in tabs, page layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates.						
	Label	Opportunity Automobile	Example: Account				
	Plural Label	Opportunity Automobiles	Example: Accounts				
	Starts with vowel sound						
The Object Name is used when referencing the object via the API.							
	Object Name	Opportunity_Automobile	Example: Account				
	Description						
	Context-Sensitive Help Setting	 Open the standard Salesforce.com Help & Training window Open a window using a Visualforce page 					
	Content Name	-None- ∨					
	Enter Record Name Label and Format						
	The Record Name appears in page layouts, key lists, relate Record Name	ed lists, lookups, and search results. Opportunity Automobile Id	For example, the Record Name for Account is "Acco Example: Account Name				
	Data Type	Auto Number ▼					
	Display Format	OA-{0000}	Example: A-{0000} What Is This?				
	Starting Number	[1]					

- Click on Allow reports.
 Allow search
 >> Save.

Tabs

Creating A Custom Tab

• Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)

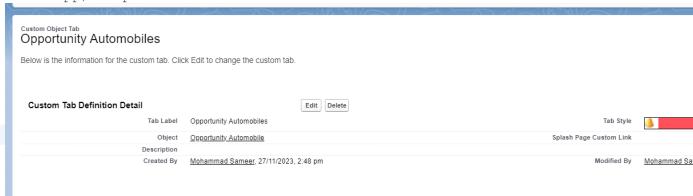

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application fu

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

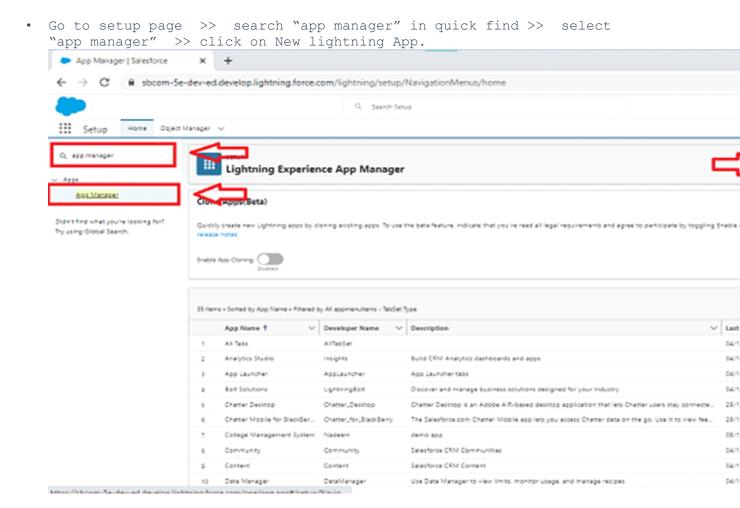

• Select Object(Opportunity Automobile) >> Select any tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) keep it as default >> Save.

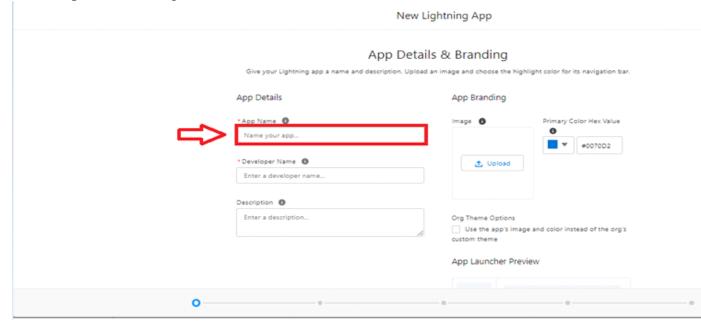

Note: Tabs for Automobile Information & Invoice objects do get created automatically. We do not need to create tabs for those objects.

The Lightning App

Create A Lightning App

- Fill the app name in app details and branding as follow
 - a. App Name :Sales Automobile Using Salesforce CRM
 - b. Developer Name : this will auto populated
 - c. Description : Give a meaningful description
 - d. Image : optional (if you want to give any image you can otherwise
 not mandatory)
 - e. Primary color hex value : keep this default
- Then click Next >> (App option page) keep it as default >> Next >> (Utility Items) keep it as default >> Next.

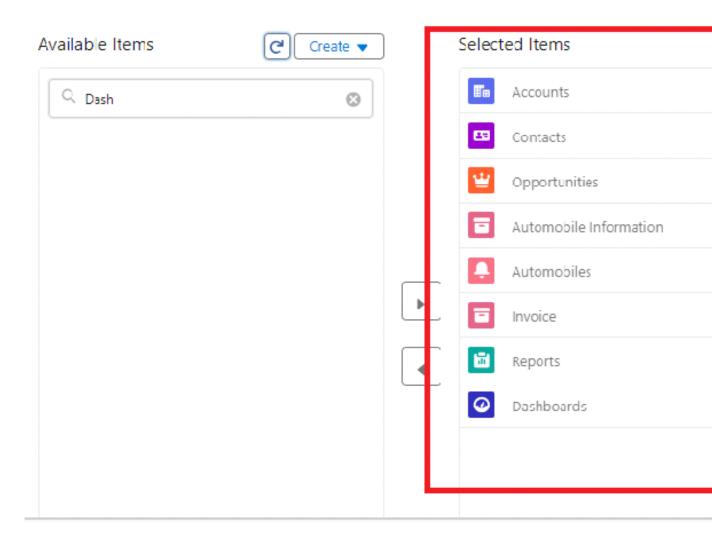

• Add Navigation Items:

New Lightning App

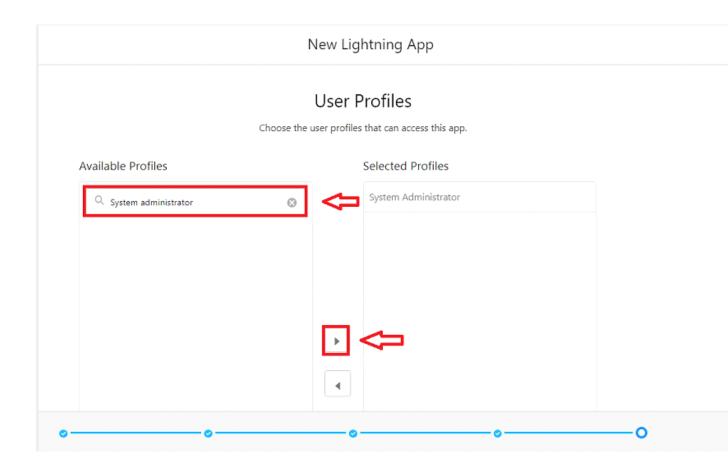

Navigation Items

ey appear. Users can personalize the navigation to add or move items, but users can't remove or rename the it are dropped from the navigation bar when the app is viewed in a format that the item doesn

• Search the items in the search bar(Account, Contact, Opportunities, Automobile Information, Opportunity Automobile, Invoice, Reports, Dashboard) from the search bar and move it using the arrow button? Next.

Note: select asset the custom object which we have created in the previous activity.

1. Search profiles (System administrator) in the search bar >> click on the arrow button >> save & finish.
